Skin booster will help to restore collagen production and improve overall skin quality. It increases firmness and tightness of the skin, improves skin texture and fine lines, stimulates your own collagen production.

Skin booster can be used for face/neck/decollete or even hands. For skin booster injections we use special nano-needles which make injections painless.

ENDORET® PRGF

ENDORET® PRGF

1 Session, 2 vials

£490

HT by Sakurami is proud to offer ENDORET PRGF therapy together with our beauty therapist Ms Yana.

Why use Endoret PRGF (Plasma Rich in Growth Factors) instead of other PRPs?

ENDORET PRGF offers many distinct advantages over traditional platelet rich plasma (PRP) therapy by creating a more rapid and natural healing response. Hundreds of endogenous proteins stimulate the tissue repair processes which includes new blood vessel formation cell mobilization and cell proliferation.

Also ENDORET PRGF is a closed system, with the necessary equipment and unitary and disposable kits certified for such use that allows a rapid preparation of plasma under sterile conditions and its immediate application.
